ABOUT ME

Machine learning for practical autonomy.

Hi, I am Je-Eon Bae, a machine learning engineer and first-year master's student in Future Automotive Mobility Engineering at Seoul National University. I am currently affiliated with the [Artificial Intelligence & Autonomous Driving Laboratory](#).

My work is motivated by a simple goal: make machine learning systems more reliable, efficient, and valuable in real-world settings. I am especially interested in vision-language-action models, autonomous mobility, data-efficient learning, model compression, and semi-supervised learning.

CURRENT FOCUS

Research directions I am building toward.

My current interests connect practical autonomous mobility with data-efficient learning systems that can operate reliably beyond clean benchmark settings.

Vision-Language-Action Models

Connecting visual perception, language grounding, and action generation for autonomous mobility systems.

02

Autonomous Driving AI

Building learning systems for driving scenes, mobility data, and safety-critical decision contexts.

03

Data-Efficient Learning

Improving model behavior with semi-supervised learning, pseudo-labeling, and efficient model design.

Seoul National University

M.S. Student, Department of Future Automotive Mobility Engineering

Affiliated with Artificial Intelligence & Autonomous Driving Laboratory

1st-year master's student

Autonomous mobility

AI and data processing

Graduated August 2023

Kyung Hee University

Department of Industrial & Management Systems Engineering

Department of Software Convergence, Data Science Track - Double Major

Major GPA 4.25 / 4.5

Cumulative GPA 4.22 / 4.5

Class rank 2nd / 80

RESEARCH EXPERIENCE

Current

Artificial Intelligence & Autonomous Driving Laboratory, SNU

Master's student researcher in Future Automotive Mobility Engineering, focusing on VLA, autonomous mobility, and practical machine learning systems.

2023.01 - 2023.06

Machine Learning Lab, POSTECH

Research intern under the supervision of Prof. Namhoon Lee, working on machine learning topics connected to model behavior and practical learning systems.

JB

Jeeon Bae

2022.01 - 2022.12

Machine Learning and Visual Computing Lab, Kyung Hee University

Research intern under the supervision of Prof. Sungho Bae, focusing on visual computing and semi-supervised learning.

PUBLICATIONS

Selected academic work

Research across semi-supervised learning, concept bottleneck models, object detection, OCR intervention, and dataset condensation.

ICML Workshop

Semi-supervised Concept Bottleneck Models

Jeeon Bae, Sungbin Shin, Namhoon Lee

ICML 2023 Workshop on AI HCI

Best Paper

Semi-Supervised Object Detection with Flexible EMA

Jeeon Bae, Daeho Lee

KCC 2023

Two-Stage Test Time Intervention for Korean OCR Models

Jeeon Bae

KCC 2023

Excellent Paper

Adaptive Regularization Loss for Improving Quality of Pseudo-label in Class Imbalanced Semi-Supervised Learning

Jeeon Bae, Sungho Bae

KSC 2022

KSC

Imbalance Loss with the Statistical Properties of Pseudo-labels in Class Imbalanced Semi-Supervised Learning

Jeeon Bae, Sungho Bae

KSC 2022

Excellent Paper

Dataset Condensation with Gradient Matching Considering Model Biased Noise

Jeeon Bae, Hyundong Cho, Chanmi Park, SungHo Bae, WonHee Lee

KCC 2022

HONORS AND AWARDS

- | | | |
|----|------|--|
| 01 | 2025 | Samsung Software Academy For Youth 13th Common Project 1st Place |
| 02 | 2023 | Korea Computer Science Conference Best Paper Award |
| 03 | 2023 | Korea Computer Science Conference Excellent Paper Award |
| 04 | 2022 | Kyung Hee University Scholarship for Outstanding Activities |
| 05 | 2022 | Kyung Hee University Software Mileage Contest Gold Prize |
| 06 | 2022 | Korea Computer Science Conference Excellent Paper Award |
| 07 | 2022 | Korea Software Conference Excellent Paper Award |
| 08 | 2022 | Kyung Hee University AI Competition 4th Place |
| 09 | 2022 | Kyung Hee University Data Analysis Competition 1st Place |
| 10 | 2021 | Academic Excellence Award |
| 11 | 2020 | Academic Excellence Award |
| 12 | 2020 | Kyung Hee University Software Idea Contest Encouragement Award |
